

Microsoft Teams Rooms make meetings more inclusive, collaborative, and intelligent.

Well-equipped conference rooms play an essential role in facilitating effective communication and collaboration during Microsoft Teams meetings.

Say Farewell to Legacy Conference Room Issues

IT Bandwidth

Obsolete A/V devices in need of frequent troubleshooting.

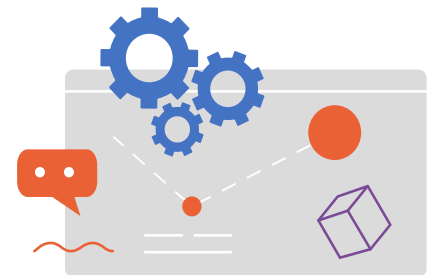

Inconsistent Experience

Meeting spaces not Teams-enabled, creating unreliable, unproductive meetings.

Poor Audio/Visual Experience

Legacy A/V standards, not suited for a good hybrid meeting experience.

Move Forward with an Enhanced Hybrid Experience

See & Be Seen

All meeting participants have a clear, inclusive view of each other.

Hear & Be Heard

Audio is clear and enhances everyone's visual experience.

Enable Collaboration

Channels to create and share content both during and after the meeting.

Microsoft Teams Rooms are built for smarter meetings.

Inclusion

- One touch and proximity join
- Inclusive video layouts
- Wireless content sharing
- Intelligent camera with IntelliFrame
- AI-Powered audio and video
- Intelligent speakers

Collaboration

- Collaborative whiteboarding
- Content camera with Logitech Scribe
- Calendar integrations

Maintenance

- Devices, software, and services secured by design
- Remotely deploy and manage rooms
- View and manage inventory
